

Kananook Commuter Car Park Construction Update May 2024

Construction of the new \$22 million multi-level Kananook Commuter Car Park, located near Kananook Railway Station and Frankston Basketball Stadium, is progressing well, with the precast concrete wall panels and first floor slab complete.

By October 2024, the 328-space car park delivered by Council in partnership with the Australian Government is expected to be complete.

It will provide much-needed parking for commuters as well as nearby recreation users in off-peak travel times.

Construction as at 6 May 2024.

Upcoming Works

Bardia Avenue/Wells Road intersection upgrade: June – September 2024

As part of the commuter car park project, the Wells Road and Bardia Avenue intersection will be upgraded to support traffic movement and minimise congestion.

This will include full signalisation of the intersection, including new pedestrian-operated signals and traffic islands, associated civil works and street lighting upgrades.

While traffic flow through the intersection will remain during construction, drivers should expect delays during business hours.

Stadium and reserve parking and traffic flow: ongoing until September 2024

Temporary parking and traffic flow changes around the basketball stadium and Kananook Reserve will continue to be in place for the duration of works and may change from time to time as works progress.

For your safety and the safety of construction staff, please follow signage and directions from onsite traffic controllers at all times.

In particular, the end of Easton Ave leading to the Basketball Stadium will be temporarily closed from June to September. Alternative access to the existing carpark can be obtained from the McCulloch Avenue entrance to Kananook Reserve.

Thank you for your patience and understanding as we work to provide safe and accessible parking for the community through the new commuter car park.
